PROFESSIONAL EXPERIENCE

BAOBAB CIRCLE

UK (Remote)

Software Developer, Android | February '22 - Present (full time)

- As the sole Android Developer in the team, I take full responsibility for the technology stack, CI/CD pipeline, and feature rollout for two applications.
- I migrated the codebase from Java to Kotlin and legacy APIs to modern APIs, including JavaRx to Kotlin Coroutines and Dagger to Hilt leading to about a 25% increase in code readability and maintainability.
- I introduced Jetpack compose to the codebase and implemented MVVM architecture. This has resulted in a 15% increase in code reusability and a 10% decrease in development time for new features.
- I have shipped new features on request as driven by the sales team.

INFLUX, INC.

Australia (Remote)

Technical Recruiter | June '20 - January '21 (full time)

- Lead recruiter in the Technical Support team with 2 direct reports
- Oversaw the hiring of thousands of technical support engineers
- Managed the process from candidate selection to training
- First interviewer for c-suite hires

Technical Support Lead | January '21 - January '22 (full time)

- Closed over 3000 tickets that fixed critical bugs for clients
- Helped clients save thousands of dollars by fixing WordPress and Shopify systems

ANDELA KENYA

Kenya (Remote)

Software Developer, Web | September '18 - November '19 (full time)

- Worked as a full-stack microservices engineer with React on the front end and Python for the backend, using Heroku, GitHub, and CircleCI for CI/CD.
- Developed RESTful APIs for multiple systems, including eCommerce (Django), Gym Management (Django), and an article-sharing platform (Flask).
- Developed UIs to consume the APIs mentioned above using ReactJS.

PERSONAL PROJECTS

KODI KENYA

Python, Django, JavaScript, React, Postgres, Heroku

- Property listing platform to match house hunters with empty properties in Nairobi
- Built with Python, Django, JavaScript, React, Postgres, and Heroku

PING MYBILLS

Android, Kotlin, Room, Architecture Components, Retrofit, Material Design

- Android app based on MVVM clean architecture
- Built with Kotlin, Room, Architecture Components, Retrofit, and Material Design
- Available on Google Play

[Find it on Google Play](#)

EDUCATION

UDACITY

Modern Android Development

Cloud DevOps Engineering (Ongoing)

ANDELA BOOTCAMP

Software Engineering

MOI UNIVERSITY

Bachelor of Science, Actuarial Science

SKILLS AND HOBBIES

Primary Tech Stacks

- Kotlin
- Android
- Java
- Gradle

Secondary Tech Stack

- Postgres
- DevOps tooling
- React/JS
- Python

Hobbies

- Culture
- Philosophy
- Science
